Attn: Michelle Carson

Dear Ms. Carson,

Re: Hydro Pole- Killiney Beach

On behalf of Director Edgson we wish to acknowledge receipt of your letter dated May 5, 2014 regarding the location of the power pole. This is an electoral area issue and subsequently will not form part of the meeting agenda package.

Staff has been in consultation with Director Edgson regarding the power pole and guy wire that was installed to service power requirements for the North Westside Fire and Rescue Boathouse.

Although I understand there may be some concern with the location, it is not uncommon to have utility poles located in areas that may be perceived as inharmonious with human interaction from time to time.

The guy wire is fitted with a suitable marker that is used throughout the industry and serves a dual role for visibility and protection. The pole was installed with all required approvals and permits.

For these reasons relocation of the pole is not being considered at this time.

Sincerely,

Chris Radford
Director of Community Services
